One Button Recording Process

Follow these step-by-step instructions to successfully record a video to a USB drive.

Step 1

Insert USB drive into the **Record USB** port

*USB Drives must be formatted to exFAT

Step 2

Wait until the white record icon appears

Step 3

Press the record icon to start recording (icon will turn red)

Step 4

To stop: press the **STOP** button (record icon turns white)

Step 5

Remove USB drive

Note:
Two files will be created per recording. The file that starts with "._" is a temporary file that can be discarded.

Step 1	Step 2	Step 3	Step 4
Insert USB	Wait for icon to turn white	Press record	Press Stop
